

# LAKSHMI ANUHYA CHITRAKAVI

+91 7207388235 | anuhya.chitrakavi@gmail.com | Hyderabad, India

## PROFESSIONAL SUMMARY:

Associate AI Engineer with 1+ years of experience across backend development, AI-powered fact-checking systems, web scraping, database-driven ETL workflows, and natural language-to-data platforms.

## TECHNICAL SKILLS:

- **Programming:** Python, SQL
- **Data Engineering:** PostgreSQL, Apache Airflow, ETL, Stored Procedures, SQLAlchemy, Azure Data Factory, ADLS Gen2, Databricks.
- **Backend:** FastAPI, REST APIs, Microservices
- **AI & GenAI:** LLMs, AWS Bedrock, Claude, Pydantic AI, Pydantic Models, LangChain, LangGraph, MCP, RAG, Prompt Engineering, Embeddings, OpenRouter
- **Infrastructure & Tools:** Docker, AWS EC2, Git, GitHub, Redis, Grafana, VS Code, PyCharm, Jupyter Notebook
- **Data & Machine Learning:** Pandas, NumPy, Matplotlib, Seaborn, Tableau, Data Cleaning, Feature Engineering, Supervised Learning.

## EXPERIENCE:

**CognitivZen Technologies Private Limited | Associate AI Engineer | July 2025 – Present**

### DEMOS - AI-Powered Social Media Fact-Checking Platform

AI-powered fact-checking platform that monitors keywords, identifies claims, retrieves supporting evidence, and uses LLMs to generate structured fact-check responses for social platforms.

- Implemented APIs for image and quote-post functionality for the Bluesky connector and orchestration layer, enabling fact-check responses to be published with supporting media.
- Developed a response-generation component using Pydantic AI, Pydantic models, and AWS Bedrock LLMs to generate structured and validated fact-check responses.
- Engineered prompts to paraphrase content into the required tone while maintaining consistent and contextually appropriate responses.
- Developed and maintained 20+ source-specific web scrapers for evidence retrieval from trusted news sources.
- Implemented Redis caching to reduce redundant scraping and LLM calls for repeated claims and improve response time.
- Used Playwright MCP to test fact-check accuracy and response consistency.

- Analyzed application logs to troubleshoot environment-specific issues and resolve service failures.

### **DataZen — Natural Language-to-Data Querying Platform**

AI-powered analytics platform that enables users to ask business questions in natural language and receive SQL-backed answers, charts, and dashboards without writing queries.

- Designed and implemented a mid-conversation clarification flow within a LangGraph multi-agent orchestrator, detecting ambiguous queries at both routing and structured-query levels to prevent incorrect SQL generation.
- Built a chart-configuration normalizer that automatically generates chart titles, axis labels, and descriptions for LLM-generated visualizations, improving chart readability and consistency.
- Designed and implemented a complete CRUD module for dashboard chart groups, including SQLAlchemy models, database migrations, and REST APIs.
- Optimized group listing by eliminating an N+1 query pattern through batch retrieval of related `group_charts` records in a single query.
- Debugged and validated Cube and MCP (Model Context Protocol) integrations using Claude, mistral and openAI to support natural-language data querying and analysis.
- Performed backend and integration-level debugging and bug fixes to improve application reliability and end-to-end functionality.

### **HMH — Data Engineering platform**

- Worked on data engineering workflows involving raw data transformation, staging, and downstream processing.
- Developed and worked with PostgreSQL stored procedures, temporary tables, staging tables, indexes, and SQL queries for data transformation and processing.
- Developed and maintained Python-based Apache Airflow DAGs to orchestrate and schedule ETL workflows.
- Used SQLAlchemy for Python–PostgreSQL database connectivity and data processing.
- Monitored and debugged scheduled Airflow workflows and investigated pipeline failures.

## **EDUCATION**

- Master of Technology (M.Tech) | Amrita Vishwa Vidyapeetham, Tamil Nadu | 82%
- Bachelor of Technology (B.Tech) | VVIT College of Engineering, Andhra Pradesh | 86%

## **CERTIFICATION**

Data Science Master's Program — Simplilearn
